# MADE IN BELGIUM

SINCE 1968

ROBLAND is a privately owned Belgian company, that was founded in 1968 by Robert Landuyt. The first successes were achieved by building affordable qualitative universal woodworking machines, a large part of which are still in use today.

We do have all resources and competencies in house for product development, parts manufacturing, product assembly, sales and after sales support.

With our state of the art, highly automated, parts manufacturing machines we are able to remain cost effective while manufacturing in Belgium near the historical city of Bruges. Although our machines will last for years, this is not enough for us. A quality service and after sales support is key to ROBLANDs success. As we manufacture all machine parts ourselves, you can rely on spare parts always being rapidly available.

Our company mission is to offer woodworking machines with the best quality/price ratio to the high end Do-It-Yourself market and to the small and medium-sized enterprise market.

Our product portfolio, aimed at the second wood processing, includes panel saws, table saws, universal machines, planers, thicknessers, spindle moulders, horizontal mortisers, a semi-automatic boring machine, a CNC boring machine, edgebanders and dust extraction systems.

We have an international dealer network and currently export over 85% of our production worldwide to more than 100 countries. In its 20.000 m<sup>2</sup> large factory ROBLAND employs over 80 people.

Combination machines have the advantage of bringing you all operations (saw, spindle moulder, tenoning, planer, thicknesser and mortiser) in a compact way and at a low budget.

With modern Robland design changing over from one operation to another is both easy and fast. Spareparts are still available multiple years after the product launch. Robland combination machines are designed by the same engineers and built in the same Belgian factory as our more industrial equipment.

Customizing your combination machine is also a possibility with Robland. You can either opt for a full combination machine offering you 4 (saw, spindle, moulder and planer thicknesser) till 6 (with extra tenoning and mortiser) operations or decide to split these operations into two machines: TZ and SD

### ALUMINIUM SLIDING TABLE WITH BOSS

The aluminium sliding table is completely anodized for better hardness and protection. The Robland bearing system with hard steel balls rolling on hardened steel round bars (BOSS) and automatic cleaning system ensures a smooth operation. The design of the profiles ensures a very high torsion and rigidity. In combination with the metallic ball cage it guarantees that the sliding table can easily take heavy loads for many years.

### SAW AGGREGATE

The saw aggregate of the NX and NLX series rotates on shells for a smooth high precision movement.

### OUTRIGGER TABLE

On the HX PRO, NX and NLX series the strong outrigger table is supported by a sturdy telescopic swinging arm guaranteeing precision even with heavy loads.

### CROSS CUT FENCE

Even our entry-level HX310 PRO uses a sturdy aluminium profile for its cross cut fence.

### CAST IRON TABLES

Heavy cast iron tables with a honeycomb structure (on NX and NLX models) and scraped surface guarantee stability and precision for a life-time.

The planer tables open up like butterfly wings offering easy access to the thicknesser.

### ENHANCED COMFORT

The microgrooves in the table surface allow for a smooth gliding of the wood while the perforations near the cutter block decrease the noise level significantly.

### LARGE STRONG PLANER FENCE

The large, hard anodized, planer fence makes edge planing easy. Thanks to its special swivel-support bracket, the fence sets at any angle without a gap between the fence and the table surface.

### TABLE EXTENSION & SUPPORT TABLE FOR POWER FEEDER

The cast iron table extension provides additional support while moulding.

The cast iron “fold away” support table allows for quick and easy mounting of the power feeder. (Standard on NX and NLX series, option on HX series.)

### ANTI-TORSION TUBE

An anti-torsion tube filled with concrete offers increased rigidity to the frame, absorbs vibrations and functions as a counterweight for the load of the sliding table.

### ANALOGUE READOUT FOR THICKNESSER

Handwheel with integrated analogue readout for the thicknesser table. This mechanical readout offers even more comfort and precision than the standard ruler.

### ANALOGUE READOUT FOR SPINDLE-MOULDER

The handwheel with integrated analogue readout indicating the height of the spindle moulder.

### DIGITAL READ-OUTS

Digital read-out on parallel fence with micro adjustment (NLX & NLX-TZ)

This increases ease of use and accuracy.

### TERSA CUTTER BLOCK

The tersa cutter block (not on HX260) for very fast exchange of the blades.

### SPIRAL CUTTER BLOCK

The spiral cutter block (not on HX260) for lower noise level on hardwood.

### HEAVY DUTY TOP CAP

On the NLX type of machines it is possible to mount on the spindle moulder a heavy duty top cap for a better repeatability and more effective dust extraction. This heavy duty top cap also accepts tools with a large diameter.

### WHEEL SET

With the wheel system consisting of two fixed wheels at one side and a swiveling wheel with steering handle at the other, you can easily move your machine. (not available on the NLX Pro)

### MORTISING UNIT

The mortising unit consists of a sliding cast iron table and a wood clamp. Two control levers allow for comfortable handling. Limiters can be set to guarantee the right dimensions.

### TENONING

The tenoning safety hood and cast iron tenoning table with fence and wood clamp enable you to execute your tenoning work in all safety. The safety hood for tenoning accommodates for tooling with a diameter up to 260 mm. (requires optional motor break)

### SUPPORT TABLE

The extra support table on the sliding table facilitates the processing of big panels.

# ACCESSORIES

## RAV32 - BASIC MODEL FEEDER

- 3 feeding rolls diam 80 x 28 mm
- 4 speeds: 5/6,5/8/11 m/min
- Arm length 700 mm
- Weight: 33kg

## SUPPORT ROLLER

- Support roller with cylindrical roller and balls.
- A foot pedal allows for easy height adjustment.

## DUST COLLECTOR

### DC1300 - 1,5 kW / 3 x 400V or 1,5kW single phase

- 2500 m<sup>3</sup>/h
- 1 bag diameter 500 mm x 800 mm height
- Box dimensions: 920 x 580 x 580 mm
- Weight: 50 kg

## DUST COLLECTOR

### DC2300 - 2,2 kW / 3 x 400V or 2,2kW single phase

- 3900 m<sup>3</sup>/h
- 2 x bags diameter 500 mm x 800 mm height
- Box dimensions: 170 x 560 x 570
- Weight: 64 kg
